**Re: Freedom of Information Act Request
Expedited Processing and Fee Waiver Requested**

To whom it may concern:

This letter constitutes a request (“Request”) pursuant to the Freedom of Information Act (“FOIA”), 5 U.S.C. § 552, submitted on behalf of the Open Society Justice Initiative (“Justice Initiative”), an operational program of the Open Society Institute (“OSI”), a New York State charitable trust and nonprofit organization. We request records concerning the timing and substance of the Executive Branch’s response to the novel coronavirus, now known as severe acute respiratory syndrome coronavirus 2 or “SARS-CoV-2,” the virus that causes the disease known as coronavirus disease 2019 or “COVID-19.” This request is submitted to the Centers for Disease Control and Prevention (CDC). We respectfully ask that this request be forwarded to any other component agency as appropriate.

Expedited processing is requested pursuant to 5 U.S.C. § 552(a)(6)(E), as is a fee waiver, pursuant to 5 U.S.C. § 552(a)(4)(A)(iii).

A. RECORDS REQUESTED

The Justice Initiative requests disclosure of the following records¹ (including communications²) about what is now known as the novel coronavirus, SARS-CoV-2 or COVID-19 (“the virus”) created on or after December 1, 2019³:

1. Records including and/or referring to January 2020 communications between the immediate office of CDC Director, Robert Redfield (including Robert Redfield himself), and the office of George Gao, director of China’s CDC (including George Gao himself) about the virus.⁴
2. Communications from December 1, 2019 until June 1, 2020, between Assistant Secretary for Preparedness and Response, Robert Kadlec and the CDC Director about the virus.
3. Communications from January 1, 2020 until June 1, 2020 between White House Officials and a) Steve Monroe, Associate Director for Laboratory Science and Safety, or b) Michael Lademarco, Center for Surveillance, Epidemiology, and Laboratory Services, regarding testing for the virus.
4. Communications from December 1, 2020 until June 1, 2020, between the immediate office of CDC Director, Robert Redfield (including Robert Redfield himself), and White House officials (including President Trump) about the virus, including but not limited to personal protective equipment (“PPE”) and other medical equipment/supplies (e.g. ventilators, test kits), testing, social distancing/reopening, tracing and/or treatment (including drugs and/or vaccines) for the virus.⁵
5. Communications from February 1, 2020 until March 1, 2020, between Nancy Messonnier (Director, NCIRD), and the immediate office of Robert Redfield (including Robert Redfield and/or his Chief of Staff, Kyle McGowan) about the virus.
6. Communications from December 1, 2019 until April 1, 2020, between World Health Organization (WHO) officials and Robert Redfield, Inger Damon (Director, High-Consequence Pathogens and Pathology), Nancy Messonnier, Daniel Jernigan (Director, Influenza Division, NCIRD) or Martin Cetron (Director, Global Migration and Quarantine) about the virus.
7. Communications from December 1, 2019 until March 15, 2020, between Jay Butler (Deputy Director for Infectious Diseases), Daniel Jernigan or Ann Schuchat (Principal Deputy Director, CDC) about activating a response to the virus.
8. Communications from December 1, 2019 until April 22, 2020, between Dr. Rick Bright (then-Director, BARDA) and the CDC Director.
9. Records (from February 1, 2020 until June 23, 2020), referring to chloroquine phosphate and/or hydroxychloroquine sulfate for the virus, including but not limited to a) the request for, issuance of, and/or concerns about an Emergency Use Authorization (EUA) for these drugs to treat the virus; and/or b) the lifting of an “import alert” on an Indian pharmaceutical company, IPCA Laboratories Ltd, allowing it to supply these drugs to the US.⁶

¹ For the purpose of this request, the term “records” includes, but is not limited to, any and all agendas; agreements; analyses; calendars; correspondence; data; databases; directives; documents; e-mails and e-mail attachments, including those sent through personal email accounts (e.g., Gmail); reports; rules; schedules; studies; tables of contents and contents of binders; talking points; technical specifications; training materials; examinations; faxes; files; guidance; guidelines; evaluations; instructions; letters; manifests; manuals; memoranda; notes; orders; prepared documentation for meetings, calls, teleconferences, or other discussions responsive to our request; policies; procedures; protocols; text messages and messages sent or received through other messaging applications (e.g., WhatsApp, iMessage, Telegram, Signal); voicemails; and any other materials. In the event that such records once existed but have now been destroyed, please disclose any records that are integrally related to, summarize, or are interchangeable with said records. Press clippings and news articles that are unaccompanied by any commentary need not be produced.

² For the purpose of this request, the term “communications” includes, but is not limited to, memoranda; calendar entries; correspondence; briefings; directives; e-mails and e-mail attachments, including sent through personal email accounts (e.g., Gmail); faxes; instructions; letters; text messages and messages sent or received through other messaging applications (e.g., WhatsApp, iMessage, Telegram, Signal); and voicemails. In the event that such communications once existed but are no longer available, please disclose any records that are integrally related to, summarize, or are interchangeable with said records.

³ For categories where an end date is not specified, we expect that you will apply the date on which a genuine search for responsive records begins.

10. Records about the virus, created on or after February 1, 2020, referring to the biodefense company “Emergent Biosolutions.”⁷
11. Records created on or after February 1, 2020 referring to Moncef Slaoui,⁸ “Project Airbridge,” Jared Kushner or any person purporting to speak on his or his coronavirus team’s behalf including, but not limited to, Rachael Baitel.⁹

B. BACKGROUND

The earliest known case of COVID-19 (the disease caused by what is now known as SARS-CoV-2) reportedly can be traced back to November 17, 2019, in Hubei province, China.¹⁰ By December 31, 2019, health officials in Wuhan posted a notice that they were investigating an outbreak of pneumonia in the city, and the World Health Organization (“WHO”) acknowledged that on that date it “was informed of a cluster of cases of pneumonia of unknown cause.”¹¹ As of January 3, 2020, Chinese authorities reported a total of 44 patients with pneumonia of unknown etiology to the WHO.¹²

Media reports provide varying accounts of when the U.S. Executive Branch first received notice of what is now known as SARS-CoV-2.¹³ According to the *Washington Post*, on January 3, 2020, a Chinese official informed Robert Redfield, Director for the Centers for Disease Control and Prevention (“CDC”), of the outbreak of a respiratory illness in the city of Wuhan.¹⁴ Redfield relayed the report to Alex Azar, Secretary for Health and Human Services (“HHS”), who reportedly relayed it to the White House.¹⁵

Although the Executive Branch has publicly promised transparency, the White House reportedly ordered federal health officials to treat top-level coronavirus meetings as classified to keep meeting participation low and prevent leaks.¹⁶ Classification prevented relevant officials from attending the meetings because they did not possess the requisite security clearances.¹⁷

On January 21, 2020, the CDC publicly confirmed the first U.S. novel coronavirus case, what is now known

¹⁷ *Id.*

as SARS-CoV-2, in the state of Washington.¹⁸ On January 29, 2020, the White House announced the formation of “a coronavirus task force,” while noting that “[t]he risk of infection for Americans remains low.”¹⁹ On January 30, 2020, the WHO declared the outbreak a “Public Health Emergency of International Concern.”²⁰ Hours after that declaration, President Trump said during a speech on trade at a Michigan manufacturing plant, that the virus was “going to have a very good ending for us. So that I can assure you.”²¹

The WHO began supplying diagnostic test kits to various countries in January 2020, but the U.S. did not use that test, choosing instead to develop its own.²² Contrary to an April 2018 agreement between the CDC and three of the biggest associations involved in lab testing, the Executive Branch reportedly prevented non-government laboratories from assisting in testing.²³ The CDC released a flawed test in February 2020 that took weeks to correct.²⁴

The Executive Branch has responded disparately to state governors’ requests for drugs, medical supplies and equipment, prompting questions about whether politics influenced their allocation across states.²⁵

Since January 2020, President Trump has repeatedly downplayed the threat of the virus.²⁶ On January 22, President Trump said he publicly was not worried about a pandemic, stating, “We have it totally under control...It’s one person coming in from China, and we have it under control. It’s going to be just fine.”²⁷ On January 24, President Trump tweeted that the “United States greatly appreciates [China’s] efforts and transparency,” and “it will all work out well.”²⁸ On February 7, 2020, he tweeted that “as the weather starts to warm...the virus hopefully becomes weaker, and then gone.”²⁹ On February 10, he stated at a New Hampshire rally, “looks like, by April, you know, in theory, when it gets a little warmer, it miraculously goes away.”³⁰ On February 24, he tweeted that “[t]he Coronavirus is very much under control in the USA.”³¹ On March 7, President Trump publicly stated that “[a]nybody that needs a test, gets a test. They’re there. They have the tests. And the tests are beautiful.”³²

In March 2020, Jared Kushner, President Trump's son-in-law and senior adviser, reportedly created his own team of government allies and private industry representatives to work alongside the official coronavirus task force.³³ Kushner's outside advisers were reportedly emailing large groups of government employees from private email addresses.³⁴ Kushner reportedly was also the White House "point person" for "Project Airbridge" which purports to work with private companies to bring medical supplies from other countries to the United States.³⁵

On March 19, President Trump publicly suggested during his daily coronavirus briefing that the drugs Remdesivir, Chloroquine and Hydroxychloroquine were a possible "game changer" for treating COVID-19,³⁶ despite insufficient evidence of their efficacy.³⁷ A few days later, a man died and his wife was hospitalized after the couple ingested a form of Chloroquine.³⁸

On April 3, 2020, President Trump reversed previous guidance on masks while announcing that people in the U.S. should wear face coverings in public to slow the spread of what is now known as SARS-CoV-2.³⁹ On April 14, contrary to his previous praise for China's "efforts and transparency,"⁴⁰ President Trump announced that he had instructed the Executive Branch to suspend funding to the WHO because it "willingly took China's assurances to face value" and "pushed China's misinformation."⁴¹

On April 16, 2020, after the White House released nonbinding guidelines recommending how and when states and localities should begin to reopen parts of the economy, President Trump stated that governors could reopen businesses by May 1 or earlier if they believed it prudent.⁴² On April 22, 2020, Dr. Rick Bright, former director of HHS Biomedical Advanced Research and Development Authority and deputy assistant secretary for preparedness and response, said that he was dismissed from his positions and transferred to the National Institutes of Health after he pressed for rigorous vetting of Hydroxychloroquine, the drug embraced by President Trump for treating the virus.⁴³

On April 23, 2020, President Trump suggested at a White House briefing that an "injection inside" the human

body with a disinfectant could help combat COVID-19.⁴⁴ The same day, the Environmental Protection Agency issued a press release warning against ingesting disinfectants or applying them on the human body.⁴⁵ The day after the President suggested that a disinfectant injection could counter the virus, New York City's poison control center reported receiving a higher-than-normal number of calls, many of them relating to exposure to disinfectants.⁴⁶

On June 20, 2020, President Trump hosted a rally in Tulsa, Oklahoma, despite concerns about rising numbers of coronavirus cases in the area and concerns about the event becoming a "super-spreader."⁴⁷ At the rally, President Trump referred to widespread testing as a "double-edged sword."⁴⁸ He added: "When you do testing to that extent, you're going to find more people, you're going to find more cases. So I said to my people, 'Slow the testing down, please.'"⁴⁹

C. APPLICATION FOR EXPEDITED PROCESSING

The Justice Initiative requests expedited processing pursuant to 5 U.S.C. § 552(a)(6)(E), as the information and records requested are urgently needed to inform the public about actual or alleged government activity, *see* 5 U.S.C. § 552(a)(6)(E)(v)(II), and as explained below, the Justice Initiative is an organization "primarily engaged in disseminating information...to inform the public concerning" that activity. 5 U.S.C. § 552(a)(6)(E)(v)(I-II). In addition, the Justice Initiative requests expedition on the grounds that failure to obtain requested records on an expedited basis could reasonably be expected to pose an imminent threat to the life or physical safety of an individual. *See* 5 U.S.C. § 552(a)(6)(E)(v)(I).

The Executive Branch's efforts to counter SARS-CoV-2 are literally a matter of life and death for the American public. The virus is quickly spreading, killing thousands of people in the United States.⁵⁰ Today, the U.S. has the highest number of COVID-19 cases in the world.⁵¹ As of June 23, 2020, there were more than 2.3 million confirmed cases, and over 120,450 individuals had died from the virus in the United States.⁵² The CDC has estimated that by July 11th, 2020, there will likely be between 129,000 and 145,000 total reported COVID-19 deaths in the U.S.⁵³

The timing and substance of the Executive Branch's response to the novel coronavirus, including what it knew or should have known about the virus and when, what measures it has taken and when to stem the spread, and how it is has engaged with the public, Congress, state governors, WHO, scientists, and private companies the subject of ongoing and intense public debate.⁵⁴ Executive Branch officials have issued

Post, (June 19, 2020); Dylan Scott, *Trump baselessly claims Covid-19 testing is "overrated" and people wear masks to spite him* (June 18, 2020), <https://www.vox.com/2020/6/18/21295826/coronavirus-us-update-trump-wsj-interview-masks-tests>. For ongoing coverage by

conflicting statements about the threat of the virus, the availability of testing, the duration of the risk of transmission, and the efficacy of masks and particular medications and treatment for the disease.⁵⁵ As such, there is significant uncertainty about how to interpret government statements and actions relevant for determining how individuals in the U.S. should protect themselves from the coronavirus.⁵⁶ Significantly, after President Trump publicly suggested that Chloroquine was a possible “game changer,” a man died and his wife was hospitalized after the couple ingested a form of the chemical.⁵⁷ The day after the President suggested that a disinfectant injection could counter the virus, New York City’s poison control center reported receiving a higher-than-normal number of calls, many of them relating to exposure to disinfectants.⁵⁸

President Trump has repeatedly downplayed the threat of the virus.⁵⁹ He has claimed that “testing is overrated” and “makes us look bad,” and suggested that some Americans “wore facial coverings not as a preventative measure but as a way to signal disapproval of him.”⁶⁰ On June 20, 2020, he hosted a rally in Tulsa, Oklahoma, despite concerns about rising numbers of coronavirus cases in the area and concerns about the event becoming a “super-spreader.”⁶¹ At the rally, President Trump referred to widespread testing as a “double-edged sword” and said that he had told “his people” to “slow the testing down.”⁶²

In this context, failure to obtain the requested records on an expedited basis could reasonably be expected to pose an imminent threat to the life or physical safety of individuals in the United States. The information requested here is urgently needed for individuals in the United States to assess the government’s response to the virus and to make informed decisions about life and physical safety.

Furthermore, the Justice Initiative is “primarily engaged in disseminating information” within the meaning of the FOIA.⁶³ *Am. Civil Liberties Union v. Dep’t of Justice*, 321 F. Supp. 2d 24, 29 n.5 (D.D.C. 2004) (finding that a non-profit, public interest group that “gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw material into a distinct work, and distributes that work to an audience” is “primarily engaged in disseminating information” within the meaning of the statute and regulations); *cf. Elec. Privacy Info. Ctr. v. U.S. Dep’t of Def.*, 241 F. Supp. 2d 5, 11-12 (D.D.C. 2003) (finding that the Electronic Privacy Information Center was a representative of the news media based on its publication of

The Justice Initiative is an operating public interest law center dedicated to upholding human rights and the rule of law through litigation, advocacy, research, and technical assistance, with offices in New York, London, and Berlin. It is part of the Open Society Institute ("OSI"), a tax-exempt, non-partisan, not-for-profit organization, headquartered in New York City. OSI believes that solutions to national, regional, and global challenges require the free exchange of ideas and thought, and works to build vibrant and inclusive societies, grounded in respect for human rights and the rule of law, whose governments are accountable and open to the participation of all people. In support of their shared mission, OSI and the Justice Initiative share information with the public free of charge, through their websites, newsletters, and other publications to promote public understanding and robust debate. Disseminating information is among the Justice Initiative's core activities. To accomplish its goals, the Justice Initiative maintains a website, www.justiceinitiative.org, through which it disseminates reports, briefing papers, fact sheets and other publications relating to its mission (<https://www.justiceinitiative.org/publications>). It also directly distributes hard copies of publications and disseminates information via quarterly email newsletters, blogs (www.opensocietyfoundations.org/voices), Twitter (www.twitter.com/OSFJustice) and Facebook (www.facebook.com/OpenSocietyFoundations).

We affirm that information and statements concerning the need for expedited processing are true and correct to the best of our knowledge and belief.

D. APPLICATION FOR FEE WAIVER

We request a waiver of search, review and duplication fees on the grounds that disclosure of the requested information "is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester." 5 U.S.C. § 552(a)(4)(A)(iii).

As set forth in Section C above, the information and records at issue will contribute significantly to the public understanding of the timing and content of the government's response to COVID-19. Moreover, the Justice Initiative, a non-profit entity, does not seek disclosure of these records for commercial gain and intends to disseminate the information disclosed from this request to the public at no cost.

In addition, for the same reasons that render it "primarily engaged in disseminating information," *see* Section C, *supra*, the Justice Initiative is also a "representative of the news media" within the meaning of the FOIA. As such, it is entitled to a fee waiver. *See* 5 U.S.C. § 552(a)(4)(A)(ii)(II). *See also Judicial Watch, Inc. v. Rossotti*, 326 F.3d 1309, 1312 (D.C. Cir. 2003) (recognizing Congress's intent that FOIA's fee waiver provision is to be "liberally construed in favor of waivers for noncommercial requesters").

* * * * *

Pursuant to 5 U.S.C. § 552(a)(6)(E)(ii)(I) and 5 U.S.C. § 552(a)(6)(A)(i), respectively, we look forward to your reply to the request for expedited processing within ten calendar days, and to the request for disclosure within twenty days.

We request that responsive records be provided electronically in their native file format, if possible. *See* 5 U.S.C. § 552(a)(3)(B). Alternatively, we request that the records be provided electronically in a text-searchable, static-image format (PDF), in the best image quality in the agency's possession, and that the records be provided in separate, Bates-stamped files.

If this request is denied in whole or part, please justify all withholdings by reference to specific exemptions and statutes, as applicable. For each withholding, please also explain why your agency "reasonably foresees

that disclosure would harm an interest protected by an exemption” or why “disclosure is prohibited by law[.]” 5 U.S.C. § 552(a)(8)(A)(i). We seek the release of all segregable portions of otherwise exempt material, *see* 5 U.S.C. § 552(b). We also reserve the right to appeal any decision in relation to this Request.

Thank you for your prompt attention to this Request. Please **send all records and correspondence by email** to Amrit Singh at amrit.singh@opensocietyfoundations.org.

Sincerely,

A handwritten signature in black ink, appearing to read "Amrit Singh", enclosed within a thin black rectangular border.
